

Lec 23

Quine: there can be multiple?

Chomsky: there's one language faculty. We shall look for that one grammar.
↳ could be complex like cell biology? ↵

* The greed operation: Things only move to make itself checked

* .. attract .. : Things being pulled to where they moved to.

↳ probe and target theory — interestingly works for lang it isn't developed for

* Exponent — phonological realisation of feature
